

TR-INCC-TEL

Fire Fighter Telephone Module

GENERAL

The TRIGA, TR-INCC-TEL is a compact Fire Fighter Telephone Module that is used in emergency evacuation, command centers. It provides an easy-to-use selective telephone and offers voice paging to selected speaker zones. This module is a component of the following Systems.

- GEN2 Series® Expandable Emergency Evacuation System
- GEN2 Series Combined Fire and Mass Notification System
- GEN2 Series Broadband Voice Evacuation System

The TR-INCC-TEL provides a cost-effective fire fighter telephone interface. It offers a voice paging capability that is used with the following Systems:

- GEN2 Series Fire Command Center
- Voice Evacuation for Mass Notification Systems used with the GEN2 Series, Local Operating Console

When the TR-INCC-TEL is installed with the TR-ASM-16 Addressable Switch Module, it provides an easy-to-use selective telephone and offers voice paging to selected speaker zones. The LEDs display the telephone and paging status.

INSTALLATION

The TR-INCC-TEL Fire Fighter Telephone Module can be installed in any of the following types of GEN2 Series cabinets:

- Cabinet AA
- Cabinet B
- Cabinet C
- Cabinet D
