# TR-RELAY-6

Addressable Relay Module

The TR-RELAY-6 is an addressable relay module for use with Triga Series fire alarm control panels (FACPs). The TR-Relay-6 has six Form C relays. It allows a Triga FACP to switch discrete contacts by code command. If needed, you can disable a maximum of three unused modules on the TR-RELAY-6 board. No supervision is provided for the notification appliance circuit.

The TR-RELAY-6 contacts can be used for virtually any normally open or normally closed application. Each TR-RELAY- 6 is programmed with a unique signaling line circuit (SLC) loop address. When an event occurs that controls the TR-RELAY-6, the relay is triggered by the FACP.

INSTALLATION

The TR-RELAY-6 mounts in the Triga TR-IDP-ACB cabinet. The TR-IDP-ACB has a built-in chassis that will a ccommodate one or two TR-RELAY-6 modules.

• TR-2100R / ITR-2100B

• TR-2100ECSR / TR-2100ECSB
